EDUCATION

Western Governors University

Bachelor of Science in Computer Science

May 2027
Salt Lake City, UT

EXPERIENCE

Ayzenberg

Jul. 2025 – Apr. 2026

AI Engineer Intern

Pasadena, CA

- Developed internal Microsoft Copilot agents for **160+** employees, automating **16+** cross-functional workflows spanning project management, finance, HR, and more; reduced manual task time by **93%** and centralized access to company data
- Achieved **82%** response accuracy and **200ms** query latency through optimized Azure RAG pipelines
- Managed LLM/embedding models via Azure AI Foundry, ensuring scalable integration with Microsoft 365
- Collaborated with SVPs and IT leadership to deliver AI agents aligned with organizational priorities

Microsoft

Jun. 2024 – Sep. 2024

Software Engineer Intern

Redmond, WA

- Enhanced Microsoft Copilot catch-up search accuracy by **7%** by optimizing queries with Azure Search
- Reduced search latency by **200 ms** by integrating meeting summaries with C#, Azure Functions, and Kafka
- Increased query retrieval efficiency by **15%** by optimizing search pipeline with Microsoft Knowledge Graph
- Learned and applied Microsoft's internal AGILE development framework through weekly sprints
- Architected data ingestion pipelines using Azure Functions to process and index diverse telemetry into the search index

Microsoft

May 2023 – Jul. 2023

Software Engineer Intern

Remote

- Built real-time collaborations app for **100+ students** using React, resulting in a **63%** increase in classroom engagement
- Implemented messaging, polling, and feedback features using web sockets to enhance participation in real-time
- Designed analytics dashboard using GraphQL to surface action items and visualize student data
- Optimized application state and data consistency across concurrent sessions using Redux and specialized React hooks, ensuring synchronized experiences for over 100 simultaneous users.

PROJECTS

[AERIS](#) | *Next.js, YOLOv8, Groq, LLaMA, Supabase, FastAPI, Twilio, DAIN AI*

Apr 2025

- Won **1st Place Groq** at LA Hacks 2025
- Built an agentic drone system that autonomously locates disaster victims and dispatches responders to their locations
- Developed computer vision pipeline with **78% accuracy** using YOLOv8 + LLaMA for hazard and victim detection
- Automated emergency response using AI agents to find hospitals and coordinate Twilio-driven 911 calls

[SwarmAid](#) | *Python, OpenAI Swarm, Leaflet.js, Next.js, OpenAI*

May 2025

- Won **2nd Place Overall** at Hack Dearborn 2025
- Built an agent orchestration system to distribute food from suppliers to shelters in **4-7 seconds**
- Designed Swarm agents for detection, matching, routing, and compliance via API-driven coordination

[Synergy](#) | *Next.js, Flask, Supabase, LangChain, Vercel, OpenAI*

Nov 2024 – Present

- Won **3rd Place Overall** at NJIT Hacks 2025
- Built a team-matching web platform to help **4,000+ hackers** find teammates at major US hackathons
- Developed a RAG-powered recommendation system to match **100+** students per hackathon based on skills and experience

LEADERSHIP

WeCracked

May 2024 – Present

Director of Media

Remote

- Grew global hackathon community to **10,000+ students** over 3 months as media lead across multiple platforms
- Managed a team of **10+ content creators**, overseeing the development of high-quality written and video content

TECHNICAL SKILLS

Programming Languages: JavaScript, Typescript, Java, C/C++, C#, Python, SQL, Kotlin, HTML/CSS

DevTools: AWS, Azure, Postman, Vercel, Firebase, Clerk, GCP, Supabase, GraphQL, Docker, ChromaDB, Azure AI Foundry

Libraries: OpenAI, Anthropic, NumPy, Pandas, Scikit Learn, Matplotlib, OpenCV, PyTorch, TensorFlow, Keras

Frameworks: React, Node.js, Next.js, TypeScript, Flask, Material UI, ExpressJS
